

I have a dream that we will have a cleaner planet. We can do a lot of things to clean it. A few are recycling, using Hand-Me-Downs, and reusing things that lasts long.

Recycling is a great way of making a difference. If you recycle, we use the plastic you recycle and reuse it to make new things. Instead of making more plastic than we need, why not just use the plastic you shall recycle? If we make more and more plastic, our world / plane will soon be packed with it.

Using Hand-Me-Downs is a great way of saving money and clothing. Instead of throwing away clothes, why not just give it to any of your friends? You can also use the clothes you get to save money. I think using Hand-Me-Down clothes is a great way of saving money.

Re-Using thing saves you money and helps keep the world clean. Instead of using paper bags, use lunch boxes instead. Once you use the paper bags, you throw it out. You also have to use more money on buying more.

I hope you try some ideas. I also hope you participate in helping us clean our world.
